Re: Anastos Media Group, Inc.  
WUAM (AM), Saratoga Springs, New York  
Facility Identification Number: 72620  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 23, 2007, on behalf of Anastos Media Group, Inc. ("AMG"), licensee of Station WUAM (AM), Saratoga Springs, New York.<sup>1</sup> AMG seeks extension of the special temporary authority ("STA") granted July 28, 2006, for continued operation of Station WUAM with an emergency long wire antenna from the site of commonly owned Station WQAR(FM). In support of the STA request, AMG states that, after evaluation of several potential sites, it was unable to locate a site which would allow WUAM to provide the requisite service to Saratoga Springs. AMG further states that it has filed Application BP-20070119AEY, to change the community of license, and that the application remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WUAM may continue to operate with an emergency long wire antenna as described above. Operating power shall not exceed 0.15 kilowatt daytime and 0.047 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. AMG must use whatever means are necessary

---

<sup>1</sup> WUAM is licensed to Saratoga Springs, New York, for operation on 900 kHz, with 0.25 kilowatt daytime and 0.047 kilowatt nighttime, employing a nondirectional antenna (ND-1-U).

to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 12, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
